### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the closest prior art, to Algeri et al (US 4060052), Marion et al (US 4693376) and Giesinger et al (US 6063195), in combination, provides for the coating and inspecting of drawn metal parts using a plurality of spray guns to spray coat the parts and an inspection system for inspecting the coated parts. See the discussion in the Office Action of Feb. 22, 2005, paragraph 5.

Giesinger teaches that when using multiple spray guns to coat moving parts in an assembly line type situation, it is desirable to provide an additional coating gun so as to be movable to replace a faulty or broken down spray gun to take over the task of the defective coating gun (see column 4, lines 10-15). However, none of the prior art, alone or in combination, teaches or suggests the requirements of the invention as is now claimed. Both independent claims 1 and 5 require that the plurality of coating guns for coating the parts comprises a first coating gun assigned to coat drawn metal parts in a first sequential location and a second coating gun assigned to coat drawn metal parts in a second sequential location, and if inspection of parts coated with the first coating gun reveals defects then the second coating gun is enabled to coat parts in both the first sequential location and the second sequential location. This enablement of a coating gun that is already assigned to coat parts in a different area to coat the first location and the second, already assigned, location is not suggested by the teaching of Giesinger or the other references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
